DETAILED ACTION

Cancellation of claims 1-9 are acknowledged.

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 13, 2004 has been entered.

- 2. The Examiner acknowledges newly added claims 10-15 and cancelled claims 1-9. A request for continued examination withdraws the finality of the previous office action. Original claims 1-9 were directed towards a laminate. Newly added claims 10-14 are directed towards a process for making a laminate.
- 3. Since Applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 10-14 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.
- Applicant must file a divisional application or file a new application in order to prosecute the process for making a laminate.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Application/Control Number: 10/076,583

Art Unit: 1774

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Page 3

 Claims 15 is rejected under 35 U.S.C. 102(b) as being anticipated by USPN 5,733,651 to Wank et al.

Wank teaches a laminate comprising a colored layer. The laminate comprises films made from several different thermoplastic films. The laminate comprises a translucent polyurethane (PU) layer above a polycarbonate substrate or the PU layer can be the film itself (col. 9, lines 39-53) (functional equivalent to transparent PU layer). The colored layer is of a high-temperature resistant colored ink which is applied via screen printing. The PU layer is also applied to the colored layer via screen printing (col. 9, lines 39-43). See also col. 2, lines 39-50, col. 8, lines 50-68, and Examples 1-4. The PU has a thickness of 2-80 micrometers (0.020 - 0.080 mm) (col. 9, line 44), which overlaps the range of Applicant of "at least 0.025 mm". To the softening temperature of 140 to 180C and Shore A hardness of 50 to 95, these are merely inherent properties because the same material and thickness is provided for by Wank. That the laminate is prepared by the process as recited in instant claim 10 is a product by process claim. Productby-process claims are not limited to the manipulations of the recited steps, only the structure implied by the steps. Patentability of an article depends on the article itself and not the method used to produce it (see MPEP 2113). Furthermore, the invention defined by a product-by-process invention is a product NOT a process. In re Bridgeford, 357 F. 2d 679. It is the patentability of the product claimed and NOT of the recited process steps which must be established. In re Brown, 459 F. 29 531. Both Applicant's and prior art reference's product are the same.

Art Unit: 1774

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tamra L. Dicus whose telephone number is 571-272-1519. The examiner can normally be reached on Monday-Friday, 7:00-4:30 p.m., alternate Fridays. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cynthia Kelly can be reached on 571-272-1526. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
